## 1. Product Overview

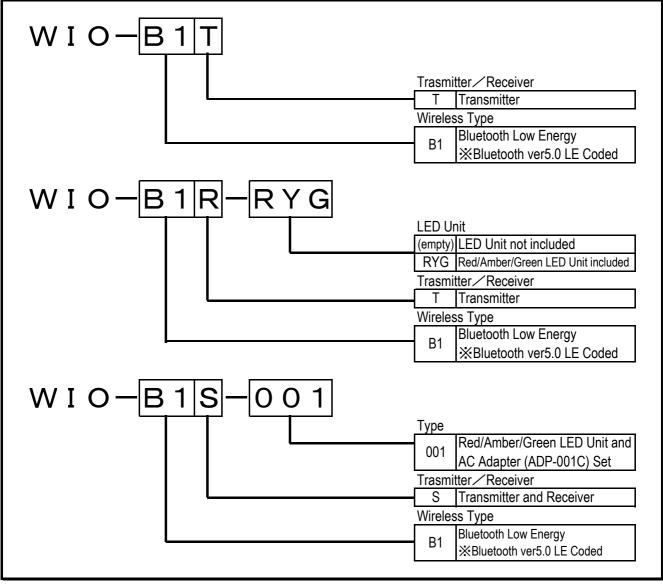

The signal input to the transmitter is sent to the receiver via wireless communication using Bluetooth Low Energy (BLE), and can operate the LED unit and buzzer unit connected to the receiver,

and can operate externally connected Beacon and Audible Alarm.

This document describes the general specifications of the transmitter/receiver and the functional specifications of their combination.

# 3. General Specifications

### 3.1. Transmitter(WIO-B1T)

	d Voltage	12 to 24 VDC (24 VDC when LED unit or buzzer unit is installed)				
	Voltage Range	10.8 to 26.4 VDC (21.6 to 26.4 VDC when LED unit or buzzer unit is installed)				
			Main Unit	Maximum: 63mA or less		
Rated Current		24V DC input	LED Unit	Maximum: 42mA or less (per tier)		
	sumption		Buzzer Unit	Maximum: 42mA or less		
		12V DC input	Main Unit	Maximum: 53mA or less		
Operating Am	bient Temperature			-10°C to +50°C		
	mbient Humidity		85% RH or less	s, no freezing, no condensation		
	ient Temperature			-20°C to +60°C		
Storage An	nbient Humidity		85% RH or less	s, no freezing, no condensation		
Mounti	ng Location			Indoors		
Mountir	ng Direction			Upright		
Protec	tion Rating		IP 65 (IEC 60529)	)、TYPE 4X,13(NEMA, UL50E) *1		
Environm	ental Conditions			Upright		
Insulatio	n Resistance	More than 5M $\Omega$ a	t 500 VDC betwee	en the live part and non-current carrying metallic part		
Withsta	and Voltage			and non-current carrying metallic part without breaking insulation		
Mass (Tol	erance:±10%)	22	0g *Hexagon nut	with flange (Accessory) not included		
Outer [	Dimensions		Refer to the	e Outer Dimension Drawing		
	Terminal Block		Screwless T	erminal Block (14 contacts)		
	Connector	SupportedWire Diameter Single wire: $\varphi$ 0.5 - 1.2 mm, Stranded wire: 0.2 - 1.5 mm <sup>2</sup> (AWG24-16)				
	Power supply		12 to 24 VDC input (12 to 24 VDC, GND)			
Interfaces		Number of Contacts	i l	7 contacts		
Intenaces	Input	Output ON current	t	10 mA or less (per contact)

# 4. Wireless Communication Specifications

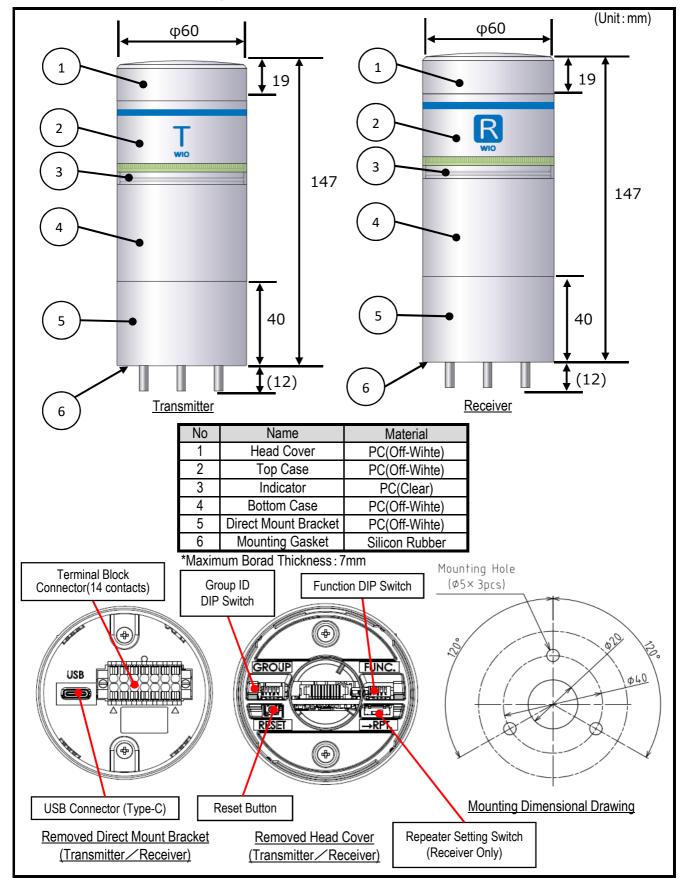

Wireless Standard	Bluetooth 5.0 (Bluetooth Low Energy)		
Communication Frequency	2402MHz to 2480MHz		
Communication Speed	125kbps (LE Coded) (Theoretical value)		
Transmit Power	+8dBm		
Communication Range	Line of sight, Approximately 100m (reference value) *6		
Communication Configuration	Transmitter:Receiver=1:1		
Group ID Setting	Up to 8 groups can be set		
Repeater Function	Possible(Only receivers can be set, maximum of 3 units/1 group)		
Supported Countries	lenen LLCA Europe United Kingdom		
and Regions <sup>*7</sup>	Japan, U.S.A, Europe, United Kingdom		
	*6 It depends on the installation location and communication		
	environment depending on the characteristics of the radio wave.		
Remark	*7 Do not use outsides of supported countries and regions.		
	Failure to do so may come into conflict with the law.		
	-		

# 5. Conformity Standards(Transmitter/Reciever)

Conformity Standards	Bluetooth SIG certification Japan Radio Law (ARIB STD-T66 Conformity) <sup>*8</sup> UL 508 ,CAN/CSA C22.2 No.14-18 FCC Part 15 Subpart B Class A, FCC Part15 Subpart C <sup>*8</sup> EN 62368-1, EN55032(Class A), EN 55035, EN 300328, EN 301 489-1 EN IEC 63000
*8 Built-in certified wireless module   • Conforms to the CE Requirements   • Conforms to the UKCA Requirements   • UL Recognized Component(File No.E215660)

## 8. Functional Specification

#### 8.1 Product Configuration

This product consists of a transmitter and a receiver.

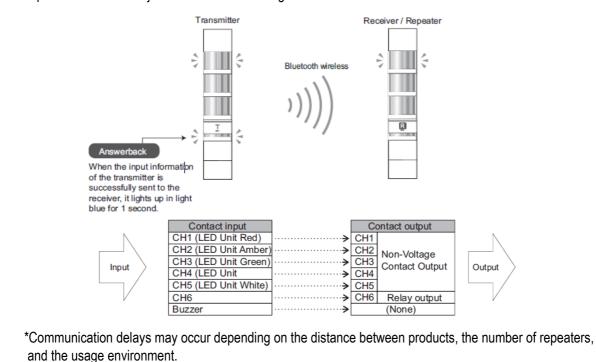

Send signals from the transmitter to the receiver/repeater via Bluetooth to operate Beacon, Signal Tower, Audible Alarm, and so on connected to the receiver/repeater.

If wireless quality is poor due to the installation location and signal conditions, the receiver can be used as a repeater for various conditions.

#### 8.2 Basic Operation

The transmitter has 7 inputs and the receiver/repeater has 5 transistor outputs and 1 relay output. You can attach additional units (LED units and buzzer unit) to this product. This product works in conjunction with the following.

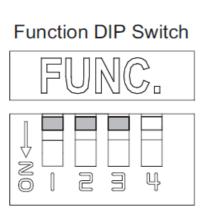

Drawing No.	Rev.	Page
WIO-B1T-A18	А	12/16

8.	3 Functional Specification Li	st
	Operating Mode	Select the operation mode from level mode/one shot mode.
	Input Logic Switching	Select the logic of the transmitter contact input.
	Group ID	Select the group ID for wireless communication.
	Wireless Repeater	Select enable/disable of the receiver's repeat function.
	Status Display	Check the status by checking the luminescent color and luminous pattern
Status Display		of the indicator on the main unit.

#### 8.4 Set Functions

Functions can be selected depending on usage and installation environment.

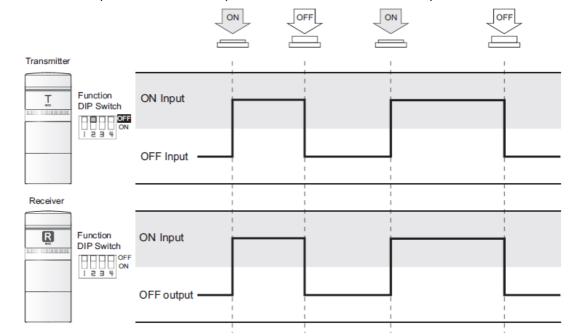

•]	Fransmitter				★ : factory default
	Swith No.	Function Name			Operation
	1	Unpairing	OFF	$\star$	Disabled
	Ι	Onpaining	ON		Execute unpairing
	2	Operating Mode	OFF	$\star$	Level Mode
	2		ON		One-shot Mode
	3	Input logic switching	OFF	$\star$	Input logic A
	3	input logic switching	ON		Input logic B
- Receiver					★ : factory default
	Swith No.	Function Name			Operation
	1	Unpairing	OFF	$\star$	Disabled
	Ι	Onpaining	ON		Execute unpairing
	2	One-shot Mode	OFF	$\star$	Output for 12 seconds
	2	output time <sup>*</sup>	ON		Hold output
	3	Not used	OFF	$\star$	-
			ON		-

\*This is valid only when the transmitting product is set to one-shot mode.

#### (1) Level Mode

The ON/OFF output of the receiver or repeater can be linked to the ON/OFF input of the transmitter.

Drawing No.	Rev.	Page
WIO-B1T-A18	А	13/16

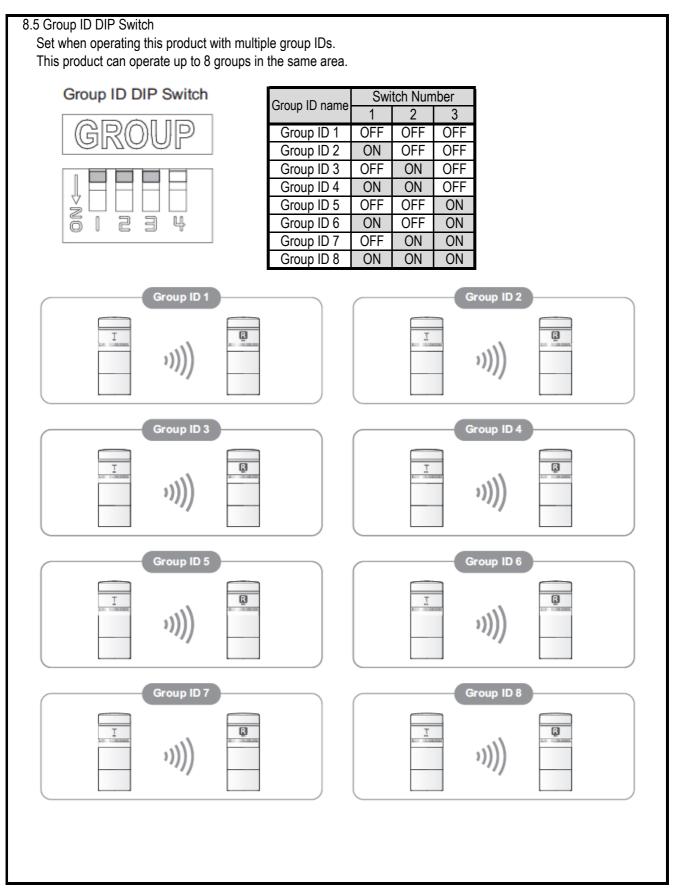

(2) One Shot Mode This product can hold the output of the receiving product (hold output/output for 12 seconds) by pressing the ON input when the transmitting product is emitting the OFF input. The output continuous state can be canceled by the receiving product. Transmitter Function Ţ **ON** Input DIP Switch OFF 2 3 4 OFF Input • Receiver Setting Function P Switch P Switch OFF OFF ON Uput DIP Switch ON output R OFF output Output for 12 seconds ON output I Z B 4 -12 seconds 12 seconds OFF output

#### (3) Input Logic A/B Switching Setting

Select for this product the logical sum of the transmitter product's ON/OFF input and the receiver product's ON/OFF output [Input Logic A (NO Contact)], and the inverse logic of the transmitter product's ON/OFF input and the receiver product's ON/OFF output [Input Logic B (NC Contact)].
